### **DETAILED OFFICE ACTION**

Applicant's amendment filed on 16 April 2009 is acknowledged and entered. Following the amendment, claims 18, 19, 24, 25 and 28 are canceled, and claim 26 is amended.

Currently, claims 26 and 27 are pending and under consideration.

#### **Withdrawal of Objections and Rejections:**

All objections and rejections of claims 18, 19, 24, 25 and 28 are moot as the applicant has canceled the claims.

#### **Double Patenting Rejections:**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 26 and 27 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 4 of U.S. Patent No. 6,476,197 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other for the following reasons.

Claim 1 of the patent is directed to an artificial polypeptide derived from a wild-type polypeptide comprising either SEQ ID NO:4 or SEQ ID NO:5, wherein the artificial polypeptide can be the amino acid sequence of SEQ ID NO:4 or 5 in which one or more cysteine residues are replaced with an amino acid residues(s) other than cysteine (part (ii)). Claim 4 of the patent is directed to a pharmaceutical composition of the artificial polypeptide of claim 1. SEQ ID NO:5 of the patent is 100% identical to the present SEQ ID NO:2. Thus, the artificial polypeptide of claim 1 of the patent reads on the variant of SEQ ID NO:2 of the present invention (claim 26, part (i)), and represents a species of the variant genus of SEQ ID NO:2, which has “one or two amino acids in SEQ ID NO:2 are replaced with other amino acids”. It is well established that a species of a claimed invention renders the genus obvious. *In re Schaumann*, 572 F.2d 312, 197 USPQ 5 (CCPA 1978). Therefore, the species claimed in claims 1 and 4 of the ‘197 patent renders instant claims 26 and 27 obvious, and the conflicting claims not patentably distinct from each other even though the scope of the inventions is different.

**Conclusion:**

No claim is allowable.
